

New 2010 Fabrics & Leathers

Leather

VINTAGE, Spice – Full-grain aniline leather on European hide. Vintage hides are dyed a light color before many layers of hand-wiped aniline stains are applied to create leather with an old-world appeal. The light base gives the leather depth of color needed to create the vintage look and feel. Vintage hides are hand-wiped in Italy using old-world techniques.

Color variations are expected from the swatch to the order, and within the same order itself. No two hides or portions of hides will be exactly the same due to the fact the leather is created entirely by hand. A clear coat is added for protection. Healed scars, scratches, neck and belly wrinkles will be apparent throughout the hide. Vintage will fade with prolonged exposure to sunlight, and is a great leather for heavily used areas.
